Order Deadline is April 20, 2011

What is a Rain Barrel?

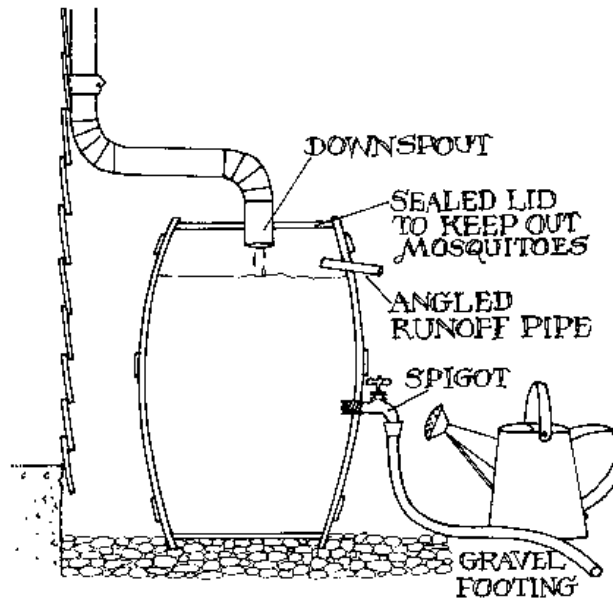

A rain barrel is an above ground container that collects and stores rainwater from downspouts and rooftops for future uses such as watering lawns, gardens and planters.

The rain barrel is filled by routing your downspout into the barrel and allowing it to harvest the natural rain water.

The rain water can then be used for your plants by attaching a hose to the included spigot.

Helpful Hints!

- You can double your barrels to double your rainwater storage.
- If you run your lawn sprinkler on a full flow for 30 minutes you can use approximately 140-160 gallons of water.
- If you have half-inch of rain fall on a 1,000 square-foot roof, you can yield approximately 310 gallons of water.
- Winter storage- remember to completely empty your rain barrel and if possible store it indoors, or turn it upside down to prevent water accumulation which could freeze and crack the barrel wall.

Why use a Rain Barrel?

- You will have a supply of free natural rain water to use around your home or garden.
- Collecting rain water reduces run-off, which reduces nutrient and sediment load in our rivers and streams
- Rain water is FREE! You are saving money, by collecting natural rain water to use around your home.
- Help save plants and newly planted trees in times of drought.
- It's responsible conservation and a "green" alternative!

Rain Barrel Sale Information

Rain Barrel Kit price of \$90.00 includes a 60 gallon recycled food grade barrel. You will receive the barrel, lid with screen wire welded to the inside to keep out bugs and debris, three overflow connections near the top of the barrel for heavy down pours or secondary barrel connection, and included will be a polyethylene spigot and cap which can be placed 4" or 13" from the bottom of the barrel, in the predrilled holes.

Accessories Available:

Flex Downspout Elbow for \$10.00, these come in a brown or white color choice, please specify.

Barrel connector for \$8.00 for multiple barrel connection.

Diverter Kit for \$25.00 which is made to fit a standard 2"X3" residential downspout, this diverter will fill your rain barrel, after your barrel is full the diverter automatically redirects rain water back into your downspout.

RAIN BARREL ORDER DEADLINE WILL BE April 20, 2011.

RAIN BARREL PICK UP WILL BE Thursday May 5th and

Friday May 6th from 7:30 A.M - 4:30 P.M.
